NOVAK MAXIMILIAN

Robert Campbell (1829-84) was a Jamaican-born printer, journalist, and teacher who, along with Martin Robison Delany (1812-85), made up the Niger Valley Exploring Party of 1859-60, an expedition organized by free African Americans to explore the possibility of colonizing parts of West Africa with black immigrants from America. Campbell traveled first to England in early 1859. He sailed on to Lagos (present-day Nigeria) and traveled northwest to Abeokuta, where he met up with Delany, a journalist, political activist, and graduate of Harvard Medical School. Acting in their capacity as commissioners of the Niger Valley Exploring Party, Delany and Campbell concluded a treaty with the king and chiefs of the Egba giving them the right to establish settlements in the Egba territory. A Pilgrimage to My Motherland: An Account of a Journey Among the Egbas and Yorubas of Central Africa is Campbell's account of the expedition, and includes descriptions of Abeokuta, ethnographic material, and the text of the treaty he and Delany negotiated. The treaty ran into political resistance among the Egba and was never implemented, but Campbell did immigrate to Africa. With his wife and four children, he settled in Lagos in 1862, where he founded and published the newspaper the Anglo-African and was involved in numerous commercial, civic, and scientific ventures that contributed to the early development of the British colony of Lagos.

"Ever since the creators of the animated television show South Park turned their lovingly sardonic gaze on the massively multiplayer online game World of Warcraft for an entire episode, WoW's status as an icon of digital culture has been secure. My Life as a Night Elf Priest digs deep beneath the surface of that icon to explore the rich particulars of the World of Warcraft player's experience." —Julian Dibbell, Wired "World of Warcraft is the best representative of a significant new technology, art form, and sector of society: the theme-oriented virtual world. Bonnie Nardi's pioneering transnational ethnography explores this game both sensitively and systematically using the methods of cultural anthropology and aesthetics with intensive personal experience as a guild member, media teacher, and magical quest Elf." —William Sims Bainbridge, author of The Warcraft Civilization and editor of Online Worlds "Nardi skillfully covers all of the hot button issues that come to mind when people think of video games like World of Warcraft such as game addiction, sexism, and violence. What gives this book its value are its unexpected gems of rare and beautifully detailed research on less sensationalized topics of interest such as the World of Warcraft player community in China, game modding, the increasingly blurred line between play and work, and the rich and fascinating lives of players and player cultures. Nardi brings World of Warcraft down to earth for non-players and ties it to social and cultural theory for scholars. . . . the best ethnography of a single virtual world produced so far." —Lisa Nakamura, University of Illinois World of Warcraft rapidly became one of the most popular online world games on the planet, amassing 11.5 million subscribers—officially making it an online community of gamers that had more inhabitants than the state of Ohio and was almost twice as populous as Scotland. It's a massively multiplayer online game, or MMO in gamer jargon, where each

person controls a single character inside a virtual world, interacting with other people's characters and computer-controlled monsters, quest-givers, and merchants. In My Life as a Night Elf Priest, Bonnie Nardi, a well-known ethnographer who has published extensively on how theories of what we do intersect with how we adopt and use technology, compiles more than three years of participatory research in Warcraft play and culture in the United States and China into this field study of player behavior and activity. She introduces us to her research strategy and the history, structure, and culture of Warcraft; argues for applying activity theory and theories of aesthetic experience to the study of gaming and play; and educates us on issues of gender, culture, and addiction as part of the play experience. Nardi paints a compelling portrait of what drives online gamers both in this country and in China, where she spent a month studying players in Internet cafes. Bonnie Nardi has given us a fresh look not only at World of Warcraft but at the field of game studies as a whole. One of the first in-depth studies of a game that has become an icon of digital culture, My Life as a Night Elf Priest will capture the interest of both the gamer and the ethnographer. Bonnie A. Nardi is an anthropologist by training and a professor in the Department of Informatics at the Donald Bren School of Information and Computer Sciences at the University of California, Irvine. Her research focus is the social implications of digital technologies. She is the author of A Small Matter of Programming: Perspectives on End User Computing and the coauthor of Information Ecologies: Using Technology with Heart and Acting with Technology: Activity Theory and Interaction Design. One of the very first books to take Stephen King seriously, Landscape of Fear (originally published in 1988) reveals the source of King's horror in the sociopolitical anxieties of the post-Vietnam, post-Watergate era. In this groundbreaking study, Tony Magistrale shows how King's fiction transcends the escapism typical of its genre to tap into our deepest cultural fears: "that the government we have installed through the democratic process is not only corrupt but actively pursuing our destruction, that our technologies have progressed to the point at which the individual has now become expendable, and that our fundamental social institutions—school, marriage, workplace, and the church—beneath their veneers of respectability, evolved into perverse manifestations of narcissism, greed, and violence." Tracing King's moralist vision to the likes of Twain, Hawthorne, and Melville, Landscape of Fear establishes the place of this popular writer within the grand tradition of American literature. Like his literary forbears, King gives us characters that have the capacity to make ethical choices in an imperfect, often evil world. Yet he inscribes that conflict within unmistakably modern settings. From the industrial nightmare of "Graveyard Shift" to the breakdown of the domestic sphere in The Shining, from the techno-horrors of The Stand to the religious fanaticism and adolescent cruelty depicted in Carrie, Magistrale charts the contours of King's fictional landscape in its first decade.

Rare are works that combine personal revelations with explanations of Islam in a manner to which Westerners can easily relate. The beauty of Nicholas' Account of the Hajj (italicise) is that an Australian farm boy with an education imbued in Christian principles, and a lifetime of exposure to religions and cultures in the Arab world and South and South-East Asia, can relate to and convey in a straightforward manner Islamic beliefs and practices that many may consider foreign. Nicholas has done a great service to those interested in religions and spirituality in his descriptions of the rites of the Hajj and explanations of their origins and meaning. As a diary, the work animates the daily life of the pilgrim in an engaging style reminiscent of writings from an earlier period of exploration. Nick expresses a personal revelation, the Hajj inspires a deep sense of serenity, humility and affinity with the Almighty. The Hajj is both a voyage to Mecca as well as a recommitment to a lifelong spiritual journey. He writes, If my Account of the Hajj can contribute to inter-cultural and religious understanding, I am happy to have shared it with others.

From my first Journey Abroad in 1946 as an infant, to my last trip abroad in 1997, this is my Account of my many Varied Travels, and Experiences. "The abduction phenomenon, I have come to realize, forces us, if we permit ourselves to take it seriously, to reexamine our perception of human identity - to look at who we are from a cosmic perspective." - Dr. John E. Mack I wrote this account in order to give an inside view of the so-called 'alien abduction phenomenon'. There's been too many misconceptions around it, exploited to create the aura of sensationalism and fear; as a result, the truth got blurred and phased into the background. I've been there, I've lived through it, and this experience transformed me irrevocably. By no means has my account been influenced by reading abduction literature. These events and encounters have been a part of my life ever since I can remember; I accepted them as they were. Just recently I began to study the works of John E. Mack, David Jacobs, Budd Hopkins and other prominent researchers in the field, finding confirmation for the authenticity of what I have lived through. It was a stunning journey between realities, a paradigm-shattering interaction with other life forms, a stimulus for introspection and re-examination of my personal values and priorities. Sometimes I find it difficult to put into words the images I have seen and the concepts I have learned - for the simple reason that there are no words for the things coming out of this world. I did my best, though. I feel that everyone, whether new to ufology and the abduction phenomenon or an experienced investigator will find new material and fresh insights here. "The apparent expansion of psychic or intuitive abilities, a heightened reverence for nature with the feeling of having a life-preserving mission, the collapse of space-time perception, a sense of entering other dimensions of reality or universes, the conviction of possessing a dual human/alien identity, a feeling of connection with all of creation, and related transpersonal experiences - all are much frequent features of the abduction phenomenon." - Dr. John E. Mack, "The Passport To The Cosmos"

Recent findings on limited financial literacy and exponential growth bias suggest saving decisions may not be optimal because such decisions require an accurate understanding of how current contributions can translate into income in retirement. This study uses a large-scale field experiment to measure how a low-cost, direct-mail intervention designed to inform subjects about this relationship affects their saving behavior. Using administrative data prior to and following the intervention, we measure its effect on participation and the level of contributions in retirement saving accounts. Those sent income projections along with enrollment information were more likely to change contribution levels and increase annual contributions relative to the control group. Among those who made a change in contribution, the increase in annual contributions was approximately \$1,150. Results from a follow-up survey corroborate these findings and show heterogeneous effects of the intervention by rational and behavioral factors known to affect saving. Finally, we find evidence of behavioral influences on decision-making in that the assumptions used to generate the projections influence the saving response.

This is the author's story from 1925 to 1949. In it he relived many memories of his childhood, some happy, some sad, some frightening, and many memories of his parents.

This is the story of two people, Frank Hulscher born in Dutch East Indies (now Indonesia) and Vera Skoblin, born in North China. Unable to remain in their respective countries of birth due to the political struggles after WWII, they separately emigrated to Australia. They first met in 1958 ... this is their story.

We are "accepted in the beloved." The blessed Saviour brings the redeemed one into the presence of the Father, and says, "My Father, if thou countest Me the partner of Thy throne, receive him as Myself." Paul says, "Not now as a servant, but above a servant, a brother beloved, specially to me, but how much more unto thee, both in the flesh, and in the Lord?" He is to take the place, not of a bondsman, but of an honored member of the family and a brother in CHRIST. Think of it -once a poor, thieving, runaway slave, and now a recognized servant of CHRIST, made welcome for Paul's sake. Thus our Father saves the lawless, guilty sinner, and makes him welcome for JESUS' sake, treating him as He treats His own beloved Son. "JESUS paid it all, All to Him I owe; Sin had left a crimson stain: He washed it white as snow."

Excerpt from An Account of the Question Which Has Arisen Between the Bishop and the Church Missionary Society in the Diocese of Colombo: Being a Paper Read Originally Before the Oxford Missionary Association of Graduates, on Friday, October 20th, 1876, and Since Completed One other word of preface may be seemly. I trust it will not be thought that I mean to speak of those Clergy, with whose names I have had to deal, with the smallest bitterness or exultation; may I venture rather to express to them (if it be not too great a liberty) my respect for them; and to commend my account to their friendliness; and hereby to beg them all both Mr. Jones (with whom I greatly rejoice to feel that I may claim acquaintance), and his colleagues, whom I have met, or whom I have not met, -to pardon the bluntness of my apprehension, if there be anything in this paper which may seem to their judgment to be untruly or unkindly said? We live in a high tech world. With digital televisions, computers, cell phones, IPODS, and video games out there, one can become overwhelmed. There's technology out there to do almost everything for us. When was the last time you sat down with pen and paper and did a simple math problem? You know, add, subtract, multiply, or divide. Calculators and computers can do this for us. Most of us have to do business with banks. Many of you have felt that you've been cheated or just plain taken advantage of by banks. There are high interest rates, overdraft fees, other fees and other hidden cost. You might be surprised to find out that banks will take money from your account without any accountability. You had better brush up on your math skills. I served in the United States Air Force and lived in several states and in Great Britain. Over the past 38 years, I've had bank accounts in the United States and abroad. My story is about my encounters with only four of these banks. One good and three that was not so pleasant. Money was taken from my accounts without accountability. I'll show you how I was able to keep track of their actions and finally what I did about it.
